

Welcome To Dental Monitoring!

Peel Orthodontics has added an exciting new technology for all patients with Invisalign® Plus called Dental Monitoring (DM). Dental Monitoring, allows us to receive live/remote feedback on your treatment progress every week.

All you need to do is download the Dental Monitoring App onto your iPhone or android. Once you have done this, we will send an activation email and we would request you view the Demo mode and tutorial prior to the fitting of your Invisalign® Plus. Please do not take any live videos.

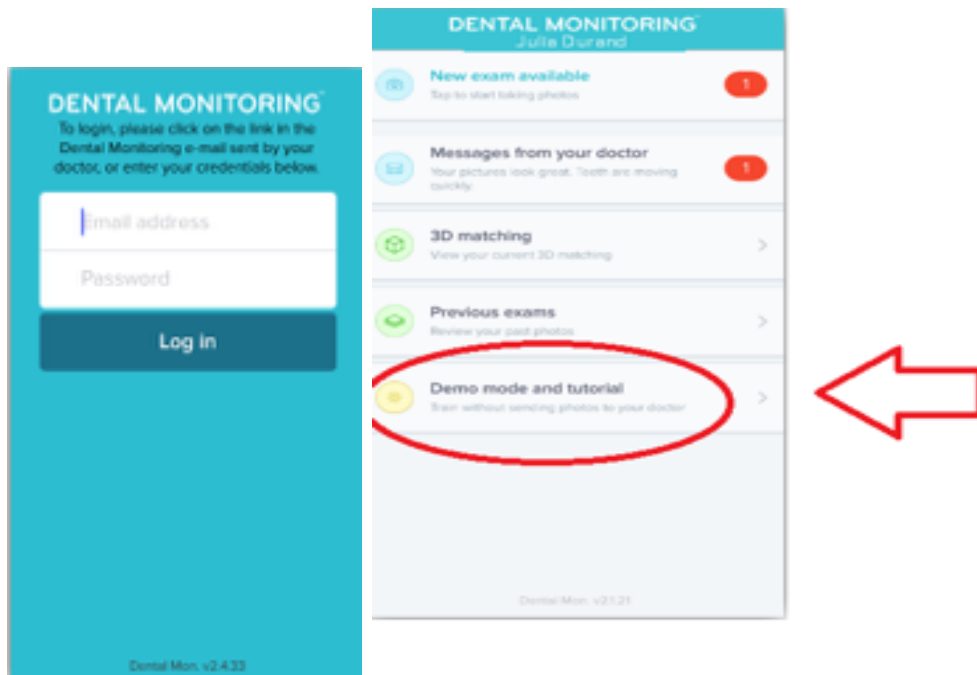

With DM you will find why their tagline is “Less time, more control”, because you will spend less time in the office (a big convenience for you), even as Dr Ash has more control over all the critical aspects of your progress.

Get ready to start monitoring!

Things to do before your scheduled appointment to get your aligners.

1. Make sure your smart phone is compatible
2. Download DM app to your mobile device
 - ✓ Login using your email address and password sent via email
3. Click on demo mode and tutorial
 - ✓ Watch tutorial prior to your appointment to get your braces/aligners

Benefits of Dental Monitoring!

- Fewer visits while being monitored more often
- Monitor dental hygiene
- Minimise special visits
- Shorter treatment time
